+, Mình đưa lên <https://gchq.github.io/CyberChef/> là nó tự ra =))

The screenshot shows the CyberChef web application interface. On the left is a sidebar with 'Operations' and 'Favourites'. The main area is divided into 'Recipe' and 'Input' sections. The 'Recipe' section contains three steps: 'From Hex', 'From Base64', and another 'From Hex' step. The 'Input' section shows the original hex string. The 'Output' section displays the decoded result: 'KCSC{Encoding_Is_Cool!!!}'. At the bottom, there is a 'BAKE!' button and an 'Auto Bake' checkbox.
